
Better sales from start to finish.

TYLERNET POINT OF SALE

WATCH THE VIDEO

SELL ITEMS QUICKLY

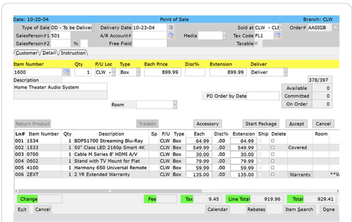
Use a barcode scanner to add items to a transaction. Or simply enter the SKU. Find unknown item numbers using our flexible search feature.

KNOW YOUR CUSTOMERS

Pull up an existing customer's information and purchase history in seconds. Add a new customer's details to the system with just a few steps.

DELIVER WITH EASE

Reserve items for a customer and complete the transaction later in Order Processing. Deliver products to the customer, schedule a store pickup, or offer a layaway option.

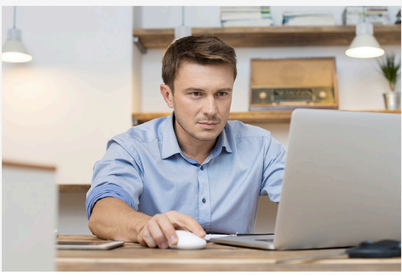


The best of both worlds.

With our intuitive Point of Sale app, you'll complete sales efficiently, whether you process 10 transactions a day or 10,000. Handle simple carry-out transactions or more complex ones like deliveries or special orders. Provide your customers with exactly what they need, when they need it.

Insights to stay ahead of the competition.

TylerNet provides tools that help you gain a competitive edge. Target your marketing campaigns more effectively by tracking how customers learned about your business. Access a customer's complete purchase history to provide a more personalized experience in your store.



Powerful tools at your fingertips.

RETURN/EXCHANGE ITEMS

Process customer returns and exchanges from the POS screen. Issue refunds to several payment types.

VIEW STOCK LEVELS

See real-time stock levels for products added to the transaction. With one extra step, view detailed breakdowns for all branches.

INCLUDE ACCESSORIES

Offer accessory (add-on) items to your customers to increase revenue and salesperson spiffs. Easily add them to the transaction.

SPLIT COMMISSIONS

Divide commissions between two salespeople by entering an employee number and percentage. We take care of the rest.

Accept several forms of payment.

- Cash
- Credit Card
- Check
- Third-party Finance
- A/R Charge
- Store Credit

Process securely.

Determine the security level that is right for your company with our extensive set of preferences. Require a manager's password for certain transaction types or when changing the price of an item. Ask for additional information about an item when processing a return or exchange. It's all up to you.

"Tyler has been an important part of our business for more than 20 years. The software has helped us grow and prosper by having up-to-date business information at our fingertips."
